WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

Strong high pressure over the Pacific Northwest will remain in place through Thursday. The N-NE/Offshore winds will diminish by early this afternoon, but temperatures will still be 5-10 degrees above normal and afternoon relative humidity (RH) will still be 12-25% through Thursday.

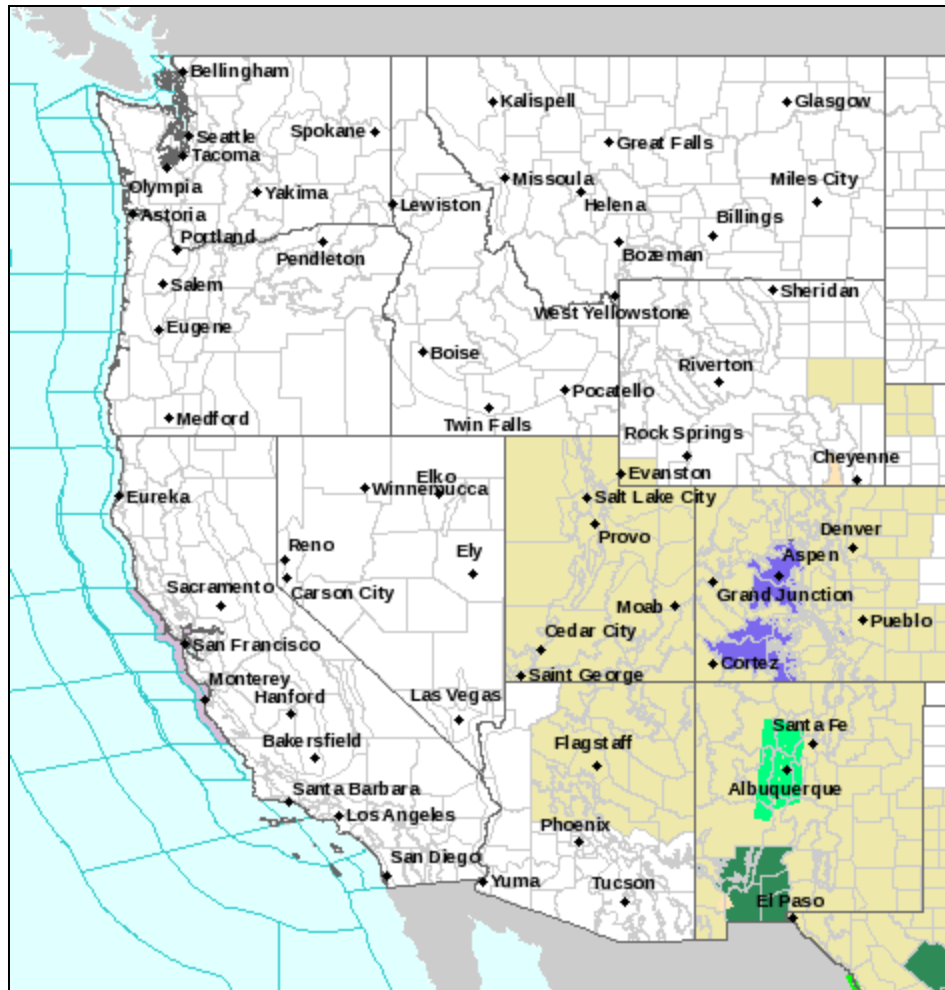

On Friday a weak cold front will sweep across our northern areas. Light rain is possible in Del Norte and Siskiyou Counties. The main effect will be a increase in clouds and SW-NW winds. Afternoon SW-W winds will gust to 25-35 mph along and east of the Cascade-Sierra crest Friday afternoon. This weekend will be dry and warm with another round of N-NE/Offshore winds, but winds are not expected to be strong enough to reach High Risk criteria. Recent forecasts are indicating a chance of a stronger cold front with more rain moving through on Tuesday and Wednesday.

SOUTHERN CALIFORNIA

Very light offshore winds continue early this morning across northern Los Angeles and Ventura County. Northeast winds of 10-15 mph were occurring across areas near highway 126 into the Oxnard Plain. The rest of the area is currently experiencing light onshore flow which should mark a return to cooler weather today. RH recovery was very low across these breezy areas this morning, but most other areas saw readings climb at least into the 30-40% range. Temperatures today will range from the 60s in the mountains to the 70s along the coast with 80s common in the valleys. Winds will be light this afternoon with some sea breezes to 15 mph along the central coast and favored passes. Thursday and Friday, high pressure off the coast will slide into Southern California which should cause temperatures to climb back into the 90s in the valleys. This weekend, the first in a series of troughs will enter the Pacific Northwest which will bring a return of cooler and more humid conditions. Highs will be back into the 60s along the coast to the lower 80s in the valleys. Night through morning low clouds will likely develop along the coastal areas Saturday night and Sunday. Northwest winds of 15-25 mph with higher gusts will be possible along the central coast and the Kern County Mountains during the afternoon hours this weekend. Next week, high pressure may rebuild over the area bringing warmer weather during the first half of the week, but most long term models indicate much cooler and windier weather will be possible next Wednesday into the following weekend.
